Through Village Care’s SeniorChoices, our community’s older adults and their families have available to them a range of options and opportunities to address their long-term care needs along with supportive services, information and wellness. Each senior has the opportunity to find placement in the setting that best promotes his or her independence and continued involvement with the community. In addition to the Village Nursing Home, SeniorChoices includes:

**Short-Term Rehabilitation.** Located as a discrete unit on two floors of Village Nursing Home, this program helps individuals achieve the highest level of recovery possible from a traumatic event through rehabilitation and therapy so they may return home as active members of their community. This program offers rehabilitation services and therapy for those who have suffered a disabling illness or condition.

**Adult Day Health Centers.** Located in the West Village and in Chelsea, our two adult day health centers enable individuals to remain at home and encourage their continued active participation and involvement with their community. Our centers offer a full range of nursing, nutritional, case management and rehabilitation services, in a medically and socially supportive environment.

**The Village at 46th & Ten.** Promoting independent living for seniors, residents continue to live comfortably and securely in their own apartment. Our residence is located at 510 West 46th Street.

**Senior Information Centers.** Offering our community’s older adults with a place to find answers about a wide range of issues and concerns impacting their lives, the senior information center provides a variety of on-site resources for seniors, including free Internet access, a health library and assistance with benefits. Our staff gives personal attention and provides direct assistance. The centers are located at 51 Seventh Avenue and 220 West 26th Street.

**Wellness and Rehabilitation Center.** Offering outpatient physical therapy for the treatment of orthopedic, neuromuscular and muscular-skeletal dysfunctions and for pain in a modern, state-of-the-art facility, providing education on safe and healthy lifestyles as well as customized exercise programs to build and maintain overall strength, endurance, mobility and functionality. The center is located at 220 West 26th Street.

Through Village Nursing Home and its related community services, we offer seniors and their families significant assistance in unique areas in order to enhance quality of life. Some of these services include:

**Palliative Care.** Alleviating and addressing pain among individuals with chronic conditions, and particularly for those approaching end-of-life, is the focus of our pain management initiative.

**Respite.** Offering families relief from the everyday burdens of caregiving, our respite program provides short-term stays for seniors, giving the care and attention they would get at home.

**Alzheimer’s Program.** The Chelsea Adult Day Health Center has created an environment that focuses on the total person – mind, body and spirit. The capacity to enjoy life does not end with a diagnosis of Alzheimer’s Disease and the Chelsea program recognizes the unique strengths, interests and needs of the individual.

For information about admission, contact our Admissions Office at (212) 337-9411.

Pre-admission visits and tours are welcome.

Village Nursing Home
607 Hudson Street
New York, New York 10014
Our skilled nursing facility is integral to SeniorChoices - an array of options for individuals requiring long-term care and assistance in living with chronic conditions. These choices offer opportunities to live in an environment best suited to one’s needs and desires.

Village Nursing Home is a place where families can find reliable, comprehensive, quality services for older adults needing full-time care for chronic conditions. Our goal is to meet the physical, social and spiritual needs of residents, recognizing the importance of preserving the dignity of each person we serve and offering individual choices that afford the greatest independence and autonomy.

**Individual Treatment** Each resident is assigned to a board-certified physician to supervise treatment. Upon admission, each resident receives a complete physical examination, with follow-up testing when needed. A comprehensive treatment plan is developed.

**Nursing Care** A registered nurse manages each unit and coordinates care through a team of RNs, licensed practical nurses and certified nursing assistants on duty around the clock.

**Social Services** A social worker is assigned to each resident to guide individuals and their families through services that are available and to address concerns and questions.

**Therapeutic Recreation** These activities address the social, cognitive, physical, emotional and spiritual well-being of residents. This is achieved through small and large group programs, special interest activities, trips, events and individual programs.

**Rehabilitation Services** Comprehensive rehabilitation care includes occupational, speech and physical therapies along with audiology services.
